LIGHT HORSE PARK – \$36 million

We're getting close to seeing the completion of our brand-new all-abilities kayak launch in Light Horse Park, Liverpool.

The kayak launch platform marks the first stage of major redevelopment works for the Light Horse Park. The works are funded by the NSW Government through a Transport for NSW, Boating Now grant, alongside Western Sydney Infrastructure Grants.

BRICKMAKERS CREEK – \$44 million

The Brickmakers Creek, Woodward Park project, (funded by Western Sydney Infrastructure Grants Program) offers 65,000 square metres of cultural and passive and active recreation space for the growing South West Sydney population.

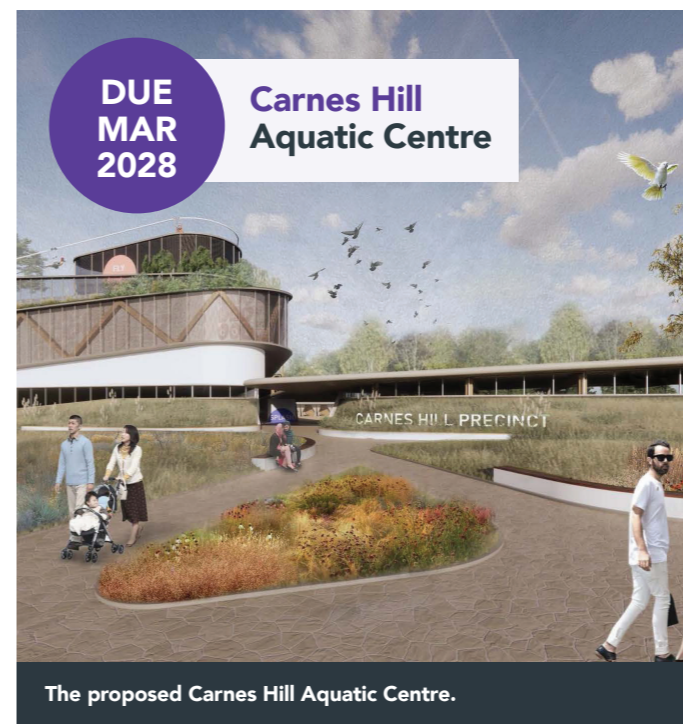

STREETSCAPES – \$29.2 million

The comprehensive upgrades to Macquarie, Railway, and Scott Streets as well as Memorial Avenue aim to significantly enhance the infrastructure, safety, accessibility and overall experience for residents and visitors of Liverpool's CBD.

CARNES HILL – \$53.4 million

We're really excited to roll out this mammoth project. We've started work on the design of the aquatic centre, to ensure we're meeting the needs of our broad community.

The commencement of the main work is on track with a start date of late October 2025 and the expected completion of the overall project is scheduled for March 2028.
